

Thrive/ P.S.H.E

Our PSHE topic this term is being me. We explore communities that we are apart of and discuss what that means for us.

In THRIVE, we focus on trying new things as we taste different foods and make salt dough for Christmas decorations. The main character from our class book helps us to accept ways in which we are different from others and identify positive things about ourselves.

British Values

This term, we focus on the British value of individual liberty. This links to our PSHE topic of individuality and themes raised in our class books, and allows us to have discussions about having our own beliefs and freedoms whilst respecting others voices as well. This means that we also cover the respect and tolerance British Value.

Key Texts / Literacy

We will be looking at Christmas around the world this half term.

Firstly, we will look at a non-fiction text called 'Visit the North Pole' to develop a persuasive leaflet. Then we will look 'Aladdin and the Enchanted lamp' to help us to write a fiction story.

Art / Music / DT

In music, we explore body percussion and create our own melody.

In D&T, we make a pavilion using a variety of resources.

Maths

We spend this term finding area by counting squares, making shapes and comparing areas. We learn written methods for multiplication and division both as well as other methods. We spend time learning when to use each method and solve reasoning problems.

Safeguarding

As it is becoming dark earlier, we discuss how to stay safe when walking home from school in the dark. As well as this, we look at general road safety and practice this as we walk to the local church. We consider electrical safety, fake news and how to use medicine safely. Anti-bullying week also falls within this term so we look at how to prevent bullying, both in person and online. We complete first aid lesson sessions where we learn life skills.

Audience / Community

We send Christmas cards to local businesses and local care homes to wish them a Merry Christmas. We also invite family into the school to watch our Christmas performance. We also visit the library to look at how to take out books.

Key Skills

This term, we focus on the 'Resilience' part of our key skills. This means we focus on not being afraid to make mistakes, perseverance and resilience skills and develop strategies to deal with new experiences and changes.

ECO

Eco areas that we look at this term are the school grounds and the habitats that we have within them. We use our forest school sessions to create homes for animals to hibernate in throughout the winter.

Computing

In this unit we will be looking at how digital audio is recorded. We will look at input and output devices and look at creating a podcast.

Science

Our science topic this term is focused around states of matter. We learn how to identify solid, liquids and gases, and complete experiments relating to melting and cooling.

Humanities

We will begin the term by exploring who the Ancient Greeks are, investigating Greek life, their achievements and their influence in the Western world. Our History learning takes us nicely into our Geography lessons where we explore Greece, explore Greece's geographical features and the settlement trade links around the world. In RE, we will explore what makes some texts sacred. We will explore the origins of religious texts and their values to their followers.

We will also have a visit from 'Portals to the Past' to learn more about the Greeks!

P.E.

In PE, we complete all of our sports inside due to weather turning cold. We refine our netball skills and explore multi skills.

Year 4 Autumn Term 2
